SOFTWARE ENGINEER

SUMMARY

Technically sophisticated software engineer with extensive experience in programming, software development, and writing readable, maintainable, quality code across a wide range of technologies. Proven track record designing and developing high-end applications consistent with unique client needs. Strong communicator skilled at building cross-functional relationships and driving technical innovation.

TECHNICAL SKILLS

Languages: Python, Perl, JavaScript, C, Assembler, SQL

Web & Mobile: Django, jQuery, Bootstrap, D3, React Native

DevOps & Tools: Docker, Kubernetes, Jenkins, Unix, Git

Practices: Agile, code review, technical writing, cross-functional collaboration, requirement analysis

PROFESSIONAL EXPERIENCE

Freelance Developer | Independent | Remote *Dec 2019 – Present*

- Various developer roles on a part-time basis, managing projects independently from requirements through deployment. Combining software engineering and UX design know how.

Engineer | Cisco Systems | San Jose, CA *Aug 2012 – Aug 2019*

- Collaborated with a team of network engineers and customers to write, update, test, and maintain 150+ technical tools and add-ons.
- Developed and sustained libraries in both Perl and Python for field engineers; designed and maintained the build system and web server for script access.
- Acted as go-to resource for cleaning up overly complex scripts from other teams, making them maintainable and modifiable again.

Technician | SVTIX | San Jose, CA *May 2011 – Aug 2012*

- Delivered on-site server support to optimize technical performance and efficiency.
- Maintained and troubleshoot systems and server applications, ensuring continuity for all users.
- Installed and configured computer hardware, software, systems, and networks.

Consultant | PRGMR.COM | San Jose, CA *May 2010 – Aug 2012*

- Served as Tools Engineer, Technical Writer/Editor, and Web Designer.
- Wrote scripts to automate new server installation and setup; helped build and install new servers.
- Programmed a web application to present product options to website visitors.

PUBLICATIONS

On Reading Tough Books | Author | 2022

Researched, wrote, and independently published a full-length nonfiction book on active reading strategies. Demonstrates project follow-through, written communication, and the ability to execute long-form independent work.
